

Softek Discovery Audit™ Third-Party Licenses

Free and Open-Source Software Licenses

The licensed software, sub-licensed software and Softek's delivery of maintenance may utilize one or more free or open-source components licensed under one or more third-party licenses, as updated from time to time (each, a "Free License"). Any use of the open-source components by Client shall be governed by, and subject to, the terms and conditions of the applicable Free License(s) and its end-user terms. On written request, Softek may provide Client with a complete machine-readable copy of the source code for free or open-source components, solely to the extent required by the terms of the Free License(s). For components subject to Free Licenses that are sub-licensed by Softek to Client, Softek grants Client rights in such components solely to the extent permitted under the Free License(s). Client agrees that the rights granted within the Free License(s) apply solely to the applicable components and in no way extend to Softek's solutions, methods, code, services, works or other proprietary, confidential or other intellectual property. Client may not use any open-source component in conjunction with Softek's products, systems or sub-licensed systems, except as expressly permitted by Softek.

Products Obtained Directly from Manufacturer

Client acknowledges and agrees that, if listed and designated within the applicable Softek agreement or schedule, some third-party products must be obtained directly from the manufacturer and used, installed or downloaded for Client's production environment in order to support one or more licensed products. Client will permit Softek to use, install and download such third-party products directly from the manufacturer on its behalf. Softek agrees to cooperate with Client's reasonable requests regarding the use, installation and download of such third-party products, but Client acknowledges that the use of such products is ultimately the responsibility of Client and hereby releases Softek from all liability in conjunction with such third-party products, including Softek's obligation regarding any third-party license terms and conditions (which shall be the sole responsibility of Client). Client agrees to execute any additional documentation, agreements or other authorization necessary to confirm or give legal effect to Softek's authority to obtain such items on its behalf.

Third-Party Terms and Conditions

- ▶ **Antlr**
<https://raw.githubusercontent.com/antlr/antlr4/master/LICENSE.txt>
- ▶ **bootstrap**
<https://github.com/twbs/bootstrap/blob/master/LICENSE>
